ENGLISH HERITAGE

MUSIC SERIES

The “renaissance” in English music is generally agreed to have started in the late Victorian period, beginning roughly in 1880, and was most notable for compositions by C.V. Stanford, C. Hubert H. Parry, Edward Elgar, Henry Walford Davies, Harold Darke and others. Public demand for major works in support of the annual choral festivals held throughout England at that time was considerable which led to the creation of many large scale works for orchestra with soloists and chorus. Although a number of those works found their way into print and are regularly performed today, a considerable number of compositions, both large-scale and more intimate works, are not available. These works either were never published or were published but are no longer available in the publishers’ catalogues. While the existence of these works is documented in biographies of the composers, the ability to study and, most importantly, to perform these compositions is not possible.

Changes in the International copyright laws in the mid-1970’s played a pivotal role in creating this void, opening a significant number of musical compositions to public access. As a result, music publishers lost the ability to generate revenue from the sale/rental of such music. Performance score inventories of these works were eliminated. In addition, for many compositions, the only published material were vocal scores - full scores and orchestra parts were hand notated for the premiere of a work and then were ‘recycled’ for future performances. While full score autograph manuscripts are now accessible through the major music libraries in the UK, the hand-notated parts have long since been lost. These autograph full score manuscripts along with copies of the published vocal scores are now the only resources available for studying and performing these works.

The English Heritage Music Series has been created to ensure that these compositions are preserved, are accessible for scholarly research and, most importantly, are available for performance by future generations. Its mission is to:

- Source unpublished/out-of-print English composer compositions that are in the U.S. public domain
- Preserve these compositions through the preparation of performance scores using notation software
- Provide open Internet access to the scores to facilitate study, performance and sharing of performance material (program notes, audio, reviews, etc.)

In preparing the English Heritage Music Series editions, every effort has been made to adhere strictly to the notation contained in the manuscripts. Because of the passage of time and its effect on the condition of the manuscript, the absence of clear information often times by the composer in notating divided instruments, and with emendations in the composer and other hands resulting from use of the manuscript in performance, there were numerous circumstances which required interpretation and decisions for notes, accidentals, dynamics, articulations and tempi. Should questions arise in the use of these editions, the composers’ autograph manuscripts and the Novello vocal scores should be consulted for clarification.

Patrick Sheldon Hadley was born on 5 March 1899 in Cambridge. His father, William Sheldon Hadley, was at that time a fellow of Pembroke College. His mother, Edith Jane, was the daughter of the Revd Robert Foster, chaplain to the Royal Hibernian Military School in Dublin.

Patrick attended St Ronan's Preparatory School at Worthing, Sussex and Winchester College in Hampshire. However the First World War interrupted his education. He enlisted in the army and was commissioned as a second lieutenant in the Royal Field Artillery. He managed to survive unscathed until the last weeks of the war, when he received an injury necessitating the below-knee amputation of his right leg. This profoundly damaged his confidence and also caused him to perhaps drink more than was wise; he was in constant pain, for which alcohol provided some relief.

Patrick's elder brother Peyton Sheldon Hadley, a former pupil of Charterhouse School, who served in the infantry, was also wounded in the closing months of the War. He was invalided home to convalesce, but died of pneumonia that October. A memorial to Peyton is found in the Charterhouse School Chapel.

After the war Patrick went up to Pembroke College, Cambridge, where by now his father was Master. He was fortunate to study with both Charles Wood and the English composer Cyril Rootham. Hadley was awarded B.Mus. in 1922, and an MA in 1925. He then went to the Royal College of Music in London. Here he came under the influence of Ralph Vaughan Williams for composition and Adrian Boult and Malcolm Sargent for conducting. Eric Weatherell notes that Hadley's contemporaries at the RCM included Constant Lambert and Gordon Jacob. He won the Sullivan prize for composition: at that time the sum of 5 shillings.

He became a member of the RCM staff in 1925 and taught composition. He became acquainted with Frederick Delius (Eric Fenby describes the role played by Hadley in recovering the long-lost score of Delius's early opera *Koanga*), Ernest John Moeran, Sir Arnold Bax, William Walton, Alan Rawsthorne, and Herbert Howells.

During 1937–38 Hadley assisted his friend and former teacher Cyril Rootham (by then terminally ill) in completing his Second Symphony. Acting as amanuensis, Hadley and others took dictation and transcribed the entire sketch for the symphony and the orchestration of the first two movements. At Rootham's request, Hadley also completed the orchestration of the final movement after the composer's death in March 1938.

In 1938 Hadley was elected to a Fellowship at Gonville and Caius College in Cambridge and appointed as a lecturer in the music faculty. Much of his time was spent in mundane administrative activities, but there was still time available for composition. Some of his greatest works were written during and after the war.

During the Second World War he deputised for Boris Ord as conductor and musical director of the Cambridge University Music Society. There he introduced a number of important works, including Delius' *Appalachia* and *A Song of the High Hills*. He was keen to promote a wide range of music, including the formation of a Gilbert and Sullivan Society. Much of his time was spent in making arrangements for the use of the males in the choir. Sadly, few of these have survived. We know them only from programme notes and hearsay. In 1946 he was elected to the Chair of Music at Cambridge University. He retained this post until his retirement in 1962. Some of the students taught by Hadley included Raymond Leppard, Sir David Lumsden, Patrick Gowers, Sir Philip Ledger and Peter le Huray.

In 1962 Hadley retired to Heacham in Norfolk. He wished to pursue his interest in folk song collection. However, he latterly struggled with throat cancer and this caused many of his activities to be suspended. Patrick Hadley died on 17 December 1973 at King's Lynn. He was 74 years old.

NIGHTFALL

Edward J. Harding

On wood and wave the gathering shadows fall,
The trees are whispering in the twilight grey,
As if one last 'good-night' they fain would say
Ere darkness shrouds them in her dusty pall.

Now one by one broad oak and poplar tall
Melt into shade; the golden-mantled day
Past the hushed lakelet softly steals away,
And solemn night sits silently on all.

But hark! the night-wind slowly creeping by
With low, dull moan the spreading darkness fills,
And slumbering nature wakes to sympathy,
For one and all the oaks and poplars sigh,
And floating faintly o'er the far-off hills
A deep sad voice comes sobbing from the sea.

ppp

Detailed description of the musical score: The score is for measures 100 to 103. The Baritone Solo part (top staff) begins with a vocal line on the word 'sea.' (written as 'sea.' with a period) and a long note. The 1st Violins (middle staff) and 2nd Violins (bottom staff) play chords with a tremolo effect. The Piano part (bottom two staves) features a complex texture with many notes in the right hand and a melodic line in the left hand. Dynamics include 'ppp' (pianissimo) for the strings and piano for the piano.
